

Mini Meta: Radio Signals

Hopefully you've been able to track down enough ghost traces of old passwords to start piecing together the password we need to get into the alien radio channel. As some added information, we know how strong the very signals are, and have provided that information for you.

(jump down for solution)

The flavor text indicates that solvers need to use solutions to the first five puzzles they had access to in the hunt. The titles of these puzzles are listed in the image, and their answers get placed in the spaces. The symbol next to the puzzle titles shows radio waves, some of which are darkened. The darkened waves indicate how many spaces to move left/right from the square in the word. If none of the waves are darkened, then no letter is taken from that side of the square.

Product Placement	A L A <u>S</u> K A	two left = L, two right = A	LA
Through the Red Ruby Window	T <u>H</u> I R T Y S I X	one left = T, one right = I	TI
Walkaround Thievery	E T E R N A <u>L</u>	two left = N	N
Pokemon Concerto	K A <u>K</u> U N A	one left = A, two right = N	AN
Flexible Thinking	M A N T I <u>C</u> O R E	two left = T, three right = E	TE

The letters found this way spell out LATINANTE or LATIN ANTE so the answer is what “ante” means in Latin which is **BEFORE**.
